Re: Janice Wilhelm, deceased

Dear Mr. Ensley:

As requested, I have reviewed the medical records of Janice Wilhelm in regard to her hospital admission to Baylor Richardson Medical Center on 7/20/2001. She was admitted for surgical resection of a tumor of the deltoid area of her left upper arm. The tumor measured 10 x 12 x 8 cm (4 x 4 3/4 x 3 inches). Examination of the tumor revealed it to be a poorly organized, lobulated, non-encapsulated lipoma.

Removal of a large non-encapsulated tumor of this size would have resulted in surgical damage to the musculature of the arm. This would have impaired her ability to pick up and manipulate a heavy object such as a .45 ACP automatic pistol.

The resultant weakness of her left, in conjunction with the location of the fatal wound, the nature of the injury, the ejection trajectory of the weapon and the location of the weapon strongly suggest the possibility of a homicide. Further investigation of this case is warranted.

Sincerely,

A handwritten signature in black ink, appearing to read "Vincent J.M. Di Maio". The signature is written in a cursive, flowing style.

VINCENT J.M. DI MAIO, M.D.
